The Sitting Room

SERVICES PROVIDED:

We are a full service interior design firm. Whether you are building a new home or just looking to refresh an existing room, we can help provide new construction and remodeling selections, along with furnishings, lighting, art, window treatments, and accessories. We have a studio with an abundance of fabrics, rugs, and tiles, as well as a separate boutique in quaint Excelsior, where our clients can shop and be inspired from the many vignettes and accessories.

“Kate has an **eye for current styles and trends**, and does an amazing job in keeping the overall look timeless.”

— ERIN S., THE SITTING ROOM CLIENT

IMPACTFUL DESIGN:

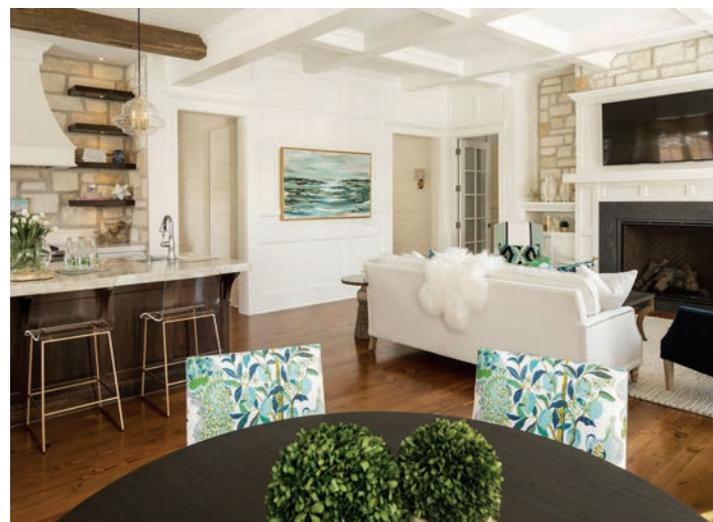

A good floor plan and proper furniture layout are critical for how a room functions and comes together visually. It is not uncommon for our designers to start rearranging furniture during an initial consultation in order to show how the room could function more efficiently with a different layout. Don't worry, we always move the furniture back!

COLLABORATION IS KEY:

From industry partners, such as vendors, local artisans, architects, builders, and clients, we've witnessed how collaboration with other professionals makes for the best design. We believe we can always learn from other creatives in this industry.

MEMORABLE REQUEST:

One of our most unique projects was designing a client's private equestrian center. We were involved in every aspect of the project, from the viewing lounges to the offices. We even gave input on the tack rooms and stables. The property also had a 100-year-old farmhouse used for visiting trainers and riders, which we updated and furnished. It was definitely a project to remember.
